

aerower Jumper 1+

We have created something new! They are steady and reliable jumper boots that can be used by anyone. So easy to use, you won't need more than a few seconds to start jumping safely to exercise, both indoors as outdoors, and feeling a new experience.

Our Aerower Quality™ System, is unique in the world, testing reliability and elasticity of each Rebound System (RS), one by one!, according to the highest European Quality Standards, you just need to worry about enjoying.

ARC

With four different resistances (Soft, Light, Hard, Xtra Hard) suitable for everyone to enjoy a rebound feeling adjusted to their weight and physical condition. The range of weights we cover is the widest and most progressive in the market.

BUMPER

We have designed a security element that protects your joints and also the parts of the RS, preventing them from colliding with each other in case you make extreme jumps.

MULTIBANDS

The multibands have nine elastic circular section straps that you can cut to adapt, with the maximum precision, to your weight and physical condition, or customize them depending on how you like to jump, run, dance, etc.

SOLE

One of our biggest challenges was to design a reliable sole, functional, and easy to assembly and disassembly without tools. Soon, we will be able to offer different models for specific uses.

TECHNOLOGY

We have created and patented a Suspension & Rebound System that allows you a simple boot assembly and personalization. You will only need occasionally an Allen key that we include in your Jumper1 box.

Innovative technology of crossed hitch prevents accidental disassembly and, at the same time, allows manual assembly and disassembly. See the User Guide for a correct mounting.

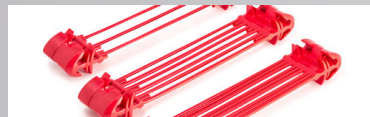

Our boots are available in five sizes (XS, S, M, L, XL) and each one covers different standard sizes from US 2 / EU 32 to US 11 / EU 46.

4 retractable bumpers have been incorporated into the sole design to form a stable base when standing. During exercise, the pressure incorporates the bumpers to the natural curvature of the sole to not affect the rebound.

In case you make an extreme jump that compresses the RS System in its totality, the bumper will avoid the collision between the arcs and the multibands, preventing the detrimental impact on your joints.

With 9 tension bands that you can cut in many combinations, this registered design allows huge precision and adaptability.

The liner is removable and can be washed by hand or by washing machine for perfect hygiene.

All terrain! State-of-the-art materials give our soles exceptional grip on all surfaces, including sand, polished floors, wet floors, rocks, snow, etc. Nevertheless, you should always make sure that the surface where you are going to jump has grip enough, avoiding jumping if you don't feel safe.

The dynamics of the system is very progressive, thanks to the reinforcements of the multibands that avoid the final collapse of compression. Therefore, we will obtain a more natural rebound curve.

4 different hardness arcs multiplied by all the different multibands configurations make the Jumper1 perfectly adjustable to your weight and athletic condition.

To prevent wear and tear and to maintain comfort, the insoles under the liner are water-proof.

Aerower Quality™ guarantees the quality of its products for 2 years from delivery to customers. Our key products are checked one by one before leaving the factory.

PACKAGING

The boots can be delivered fully assembled in their jumper box or, if the users prefer to assemble by themselves, the parts are delivered in their corresponding boxes, boot box and RS box, inside the jumper box. The only necessary mounting tool (Allen key) is included in the Jumper1 box.

COLOURS

In addition to the colours displayed here, we offer the Custom model that gives the possibility of combining all the colours at the user's choice. With certain periodicity, special limited editions are produced for events or ephemeris.

accessories

Koala bag, sports bag. With a practical, functional, and resistant design thanks to the high-quality fabrics that compose it. It has multiple compartments that allow you to carry your material and personal items well organised.

Measurements: 25 x 35 x 45.4 cm - Capacity: 34 litres

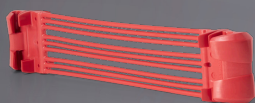

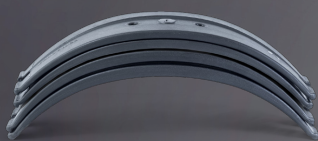

SIZE EQUIVALENCE

Our jumpers are served in five sizes (XS, S, M, L, XL) and each one is adapted to different foot sizes, from the US 2 / EU 32 to US 11 / EU 46. Thanks to its inner padded liner and the three fasteners of the boot, the foot feels always well supported and fitted while jumping.

US ^m	US ^w	EU	CM	SIZE
2-3	3-4	33-35	21-22	XS
4-5	5-6	36-37	22-24	S
6-7	7-8	38-39	24-27	M
7,5-9	8 ⁵ -10	40-42	27-29	L
9,5-11	10 ⁵ -12	42 ⁵ -46	29-30	XL

RESISTANCES (according to weight)

Four different arc hardness multiplied by nine tension bands, which can be cut at many combinations.

Our registered design allows enormous precision and tailored adaptability, enabling the Jumper1 to be adjusted to your weight and athletic condition in addition to your foot size. This is really important. Only in this way will we achieve that Jumper1 absorbs the impact properly and provides the best jumping experience on the market to all different users.

Ask our specialists or consult the following table.

WEIGHT(KG)	ARCS	BANDS
20-40	SOFT	2
40-50	SOFT	4
50-60	LIGHT	4
60-70	LIGHT	6
70-80	LIGHT	9
80-90	HARD	4
90-100	HARD	6
100-110	HARD	9
110-120	Xtra HARD	4
120-140	Xtra HARD	6
140-160	Xtra HARD	9

PACKAGING

Depending on the different quantities and combinations of sizes and pieces, the jumpers can be served assembled or disassembled so that the client can configure each model to the needs. Distributors get a better chance of optimizing stock management and lower transportation costs, especially in cases of long distances.

Showing up next are the measurements and weights with the different packages in which the products can be served.

Jumper1 jumpers box: 14 x 36 x 74 cm (Weight according to content)

Master box (5 jumpers boxes): 74 x 74 x 37 cm (Weight according to content)

Boots		Boots box (1 pair)	Boots master box (5 boots boxes)	
Size	Measures (cm)	Weight (Kg)	Measures (cm)	Weight(Kg)
XS	12 x 34 x 34	1,78	35,5 x 60,5 x 36	8,90
